## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 7, 8, 14 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 720,902 to Brau.

Brau shows a liquid supplying cartridge as seen in Figs. 1 and 2, having a casing A, a partition member F movable fit in the casing and defining a first chamber above the partition and a second chamber below the partition, an outlet port c connectable to external devices, see column 1, lines 43-47, a pressure unit G applying pressure to the partition to press an flexible envelope E connected to the partition. With respect to the cartridge housing a fuel as claimed in claim 7, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

3. Claims 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,409,714 to Strugar.

Strugar shows a cartridge for a fuel cell system as seen in Figs. 1 and 2, having a casing 1, a partition member and fluid envelop 5, an outlet port 4 and a pressure unit, see column 2, lines 11-14.

In reference to claim 21, see columns 2 and 3, lines 70-71 and 1-5 respectively.

***Response to Arguments***

4. Applicant's arguments filed February 6, 2007 have been fully considered but they are not persuasive. Applicant argues that the apparatus of Brau is not a cartridge and defines a cartridge as a refillable case containing loose substance and designed to permit ready insertion into a larger apparatus. The device of Brau meet this definition of a cartridge as it is refillable with loose substance and permits ready insertion into a larger apparatus such as a truck for its use and transportation.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
